NOVELL CERTIFIED ADMINISTRATOR

LOTUS CERTIFIED PROFESSIONALS (Lotus Notes Consultant /Application DeveloperV4.5 Principle level and Notes 5 PCLP)

ALSO A CERTIFIED SCUBA DIVER & AVID HIKER AND TRAVELER.

My current Projects are all web based applications on a Domino 5.0 platform, with significant Client-side programming in JavaScript and DHTML

- PriceWaterhouseCoopers - USA

Principle consultant developing, and web enabling, Knowledge Management application for World-wide E-Business Management Consultants. Project involving graphics artist, for interactive front-end, LotusScript programmers for back-end e-Commerce agents. Working in Miami/Tampa for Management Consultancy Services - London, with Project team in Dallas and New York. Linking application to London Business School, and rest of PwC intranet. Project included Macromedia FLASH 4, XML (in supported Notes 5.02), JavaScript, Java applets, Domain Search, Notes 4.55 and 5.02 interoperability.

- Agora Professional Services

This Lotus Premier Partner was started by the Managing Director of Lotus Consulting -UK, and Director from Anderson Consulting. They focus primarily on the Healthcare industry of the UK. Worked with them on the Alpha release of Notes 5 on a project to automate the healthcare providers in the UK. The project scale was such that Notes 4 could not handle the volume of data. Worked with Lotus as a pilot site demonstrating the effectiveness of their then new Notes 5 in being used for Industrialscale Applications.

- UBS Group Management - Zurich

Information Systems Infrastructure Department, as part of the 10 man International Notes Competence Center (3rd level support). Working along side one other, as Dominospecialist at UBS.

Responsibilities: Global Notes Applications Coordinator : Application Developer/Consultant for Group Management. Technology Leadership (evaluating new products with bias towards Internet related Document Management) More details:
Reference..

- Short assignments at: **SDI UK Ltd**. Consulting in migration of Customer services from Mainframe to Notes 4. **Islington Council**, Installation of Notes server plus clients and Training internal IS team on system administration issues etc.

- **MARS ISI**

European Application Development Team member. Rolling out basic Notes 3 applications to user population of 6000+ on 67 Notes r4 servers. Notes Application support and bug-fixing. Consulting in Notes 3 to 4 migration. The European MARS ISI Notes team is a large one. Currently there are 9 System Administrators and 12 Developers as well as standard desktop support people. Reference..

- **MTi Trading Systems Ltd.**

I have been very fortunate to work with this leading edge technology company. Mti writes trading systems for 10% of the worlds banking industry with 80 AAA banks and many central banks as customers. Internally they have UNIX and NT systems sitting on, amongst other things, 67 DEC Alpha's. Commenced with debugging Notes 3 applications –customer tracking database- testing Notes 3 applications for upgrade to Notes 4. Global deployment and upgrade of Notes 4 to 8 sites in 6 major cities. Initiated a project to integrate Notes to the INTERNET (InterNotes). Integration of Notes with MS SQL 6 database(NotesPump, Lotus Forms, ViP). Provided ½ day basic Notes user training courses. Worked with Total Quality Management team to Re-Engineer the status models of work-flow application (help desk). Reference..

- **Lexus Consulting (UK)**

Set up their London operation with Lotus **Notes r4** on **Windows NT 3.51** server and **Windows'95** clients. I also obtained Lotus Business Partner status (premier in 1998). Expanded client base and assisted in recruitment of certified Lotus Notes Specialists. We had a Notes server connected via leased line to the INTERNET and (according to Lotus Development, UK) were probably the first company to replicate their databases over the INTERNET.

- **Saint Gobain (UK & Eire)**

As the new IT Manager for this large glass manufacturer, I introduced a Lotus Notes pilot project for the Sales & Marketing department in cooperation with external consultants and succeeded in replacing the older system.

I installed the infrastructure with **Lotus Notes v3.3** on **OS/2 WARP** with LAN clients (**Novell 3.12** with **SPX**) and dial-in clients and employed an application developer for 6 weeks to create a complex **sales leads application** that distributed leads according to location and value sales rep. etc.. Data was manipulated using **ZMERGE**, thus avoiding the Notes API.

This enhanced the productivity of our 'on the road' sales force considerably and speeded up responses to customer inquiries.

An enhancement was integrating QA quick address speeding up the data entry in the address field. [Reference..](#)

##

I am seeking <u>contracts</u> as a Principle Certified Lotus Notes Consultant.

Focus:

- Upgrade projects (Notes 3/4 to Domino web-enabled 5.0)

Or

- Network installations, design and implementation of prototype applications for Notes (4 or Domino) pilot evaluation.

Or

- Installation, configuration and one-to-one tailored training programs.

Pre-requisites:

- Clearly defined plan, measurable deliverables and an agreed work scope prior to project commencement.

- Installed, functioning and well documented hardware/network that will support Notes.

At least one network specialist available to work with me.
